

Applying trace elements with EASY LIQUIDS®

Trace elements range

Correct and prevent trace element deficiencies in legumes, cereals, canola, lucerne and cotton with Coppersol®, Mangasol® and Zincsol® fertilisers from Incitec Pivot Limited.	Fertiliser	pH	Specific gravity (kg/L)	Analysis (w/v)			
				Copper	Manganese	Zinc	Sulfur
	Coppersol	3.5	1.17	6.7%			3.4%
	Mangasol	2.8	1.42		17.3%		10.1%
	Zincsol	3	1.38			16%	8.4%

Source: Incitec Pivot

Product benefits

Coppersol, Mangasol and Zincsol offer:

- Highly available forms of the trace elements to correct deficiencies quickly
- Concentrated sources of copper, manganese or zinc
- Compatibility with each other, so they can be used in combination if necessary
- Greater handling ease compared with soluble solid fertilisers, as they are delivered ready to use
- A highly uniform supply of nutrients for emerging crops when banded in the soil.

Product use

Coppersol, Mangasol and Zincsol are primarily used as foliar sprays, although they can also be applied to the soil to help prevent deficiencies.

Add a non-ionic wetter at 100 mL/100L fertiliser solution where foliar spraying. Do not add wetter when mixing with EASY N® fertiliser.

Where air temperatures are greater than 18°C, increase the volumes of water and wetter (where required) by 50% to reduce the incidence of leaf burn. Avoid making foliar applications during hot weather (greater than 25°C) and ensure the crop is not under moisture stress.

Availability

Coppersol, Mangasol and Zincsol are available in bulk truck loads or 1000 L containers.

For more information on Coppersol, Mangasol and Zincsol, contact your local Incitec Pivot Agent or Dealer.

Application guidelines

	Zincsol	Mangasol	Coppersol
Soil banded sprays: (apply with 100 L water/ha)	5 - 10 L/ha	5 - 10 L/ha	5 - 10 L/ha
Foliar sprays: used alone (add to 50-100 L water/ha)	2 L/ha	6.5 L/ha	1.5 L/ha
Foliar sprays: in combination (add to 50-100 L water/ha) *	1 L/ha	4 L/ha	1 L/ha
Foliar sprays: with 20 L/ha of EASY N (add to 50-100 L water/ha) *	0.5 L/ha	3 L/ha	0.5 L/ha
